

World Cancer Day

WEBINAR

February 4, 2020 | 12 – 1 pm

Can we eliminate cervical cancer from India? The role of HPV vaccination

Did you know that **every 9 minutes**, a mother, daughter, sister, and/or grandmother dies needlessly of cervical cancer in India? Cervical cancer is caused by a **virus** - the Human Papillomavirus (HPV), and can be prevented with HPV **vaccination** and cervical **screening**. We invite you to join us to learn more about this issue and how you can contribute by **reporting** it to your readers.
